

# #OperatorHappiness (#Bedienerglück) for your export machinery ... with software localizations by DCC Innovative – simple – efficient – value-adding

## Manuals are translated - software is localized

DCC global is a special kind of engineering service provider. For over 25 years, we have been a reliable partner to the mechanical and plant engineering industry. When it comes to the implementation of foreign languages in your projects, we are the **localization experts** – for all software applications and all languages.

### What can we do that others can't?

We are the only provider to deliver not only professional translations of your controls, visualizations, and CAD

programs optimized to the needs of machine operators, but also implemented into your program in a fully functional state and with quality assurance. Whether Germany-wide or internationally – we offer excellent processes and solutions for both small and large special-purpose and series machine manufacturers, plant manufacturers and engineering firms. One thing remains the same:

### Our process with the HMI acceptance test is unique – thus, we guarantee #OperatorHappiness!

We also solve 100 percent of all typical localization problems for HMI interface texts. We guarantee that the programs can be loaded directly onto your system and put into operation without any rework.

### What can we do for you?

We ensure short and cost-saving processes for you and increased profitability for your end customers. As your strategic partner and external specialist, we help you to work more efficiently and save costs sustainably. We fulfil your customers' individual translation requirements with high quality and reliability.

**You order – we deliver:** short processes, clear responsibilities and simple interfaces help you to smoothly process your orders with guaranteed deadline and cost reliability.

### You are going to benefit – guaranteed!

1. Implement **future-oriented and reliable solutions** for the localization of your engineering software today. We handle the entire process – with a wealth of experience from working with software providers, above all Siemens with TIA and WinCC.
2. Identify and implement **untapped savings potential** in your order processing and back office with our help. We localize the software – you simply save on money, processes, human resources capacity and effort in the end.
3. Gradually gain more efficiency, customer satisfaction, cost security and international competitiveness through our cooperation. **Individual framework agreements** will provide you with the necessary basis and security.

### Our references – #OperatorHappiness is convincing

Get an overview of our satisfied customers on our website. Among others, Siemens, a leading technology company, has been commissioning and recommending us for more than 20 years. Personal recommendations from customers in your sector are available on request.
